You are the role model for the children in your class. Everyday and in every way they look at you as an example of how to act, how to eat and how to move. If you are excited about eating healthy and being active, chances are they will be too! This section of Color Me Healthy is dedicated to Color YOU Healthy. You give your time, energy and heart to your job and your children. Don’t forget to take time for yourself, take care of yourself, eat healthy and stay physically active.

COLOR YOU HEALTHY INCLUDES:

- Re-Think Your Drink
- Enjoy More Fruits and Vegetables
- Prepare and Eat More Meals at Home
- Right-Size Your Portions
- Move More
- Tame the Tube
- Choose MyPlate
Re-Think Your Drink

Calories from beverages can add up quickly throughout the day.

Re-think your drink to cut calories from beverages.

Color Me Healthy... preschoolers moving and eating healthy
Use these strategies to increase fruit in your diet.

Keep plenty of fresh, frozen, canned and dried fruit on hand.
Take fresh fruit with you each day.
Add fruit to salads.
Add fruit to yogurt or cottage cheese.
Make tuna or chicken salad with grapes, pineapple chunks or grated apple.
Add fruit to meat kabobs.
Choose meat recipes that include fruit as an ingredient.
Serve fruit salad for dessert.
Keep individual cans of fruit in your desk drawer or car.
Make snack bags of fruit.
Keep a bowl of fresh fruit in the kitchen or at eye level in the refrigerator.

Use these strategies to increase vegetables in your diet.

Start your day with 100% vegetable juice.
Scramble eggs with green pepper, onions and mushrooms.
Add mushrooms, green pepper or sliced tomatoes to cheese toast before broiling.
Add vegetables to omelets.
Fill snack bags with vegetables.
Add vegetables to sandwiches.
Add more vegetables to soup.
Choose a salad often and serve a side salad with most evening meals.
Add cooked beans to salads and soups.
Serve main dishes that have lots of vegetables.
Keep frozen and canned vegetables on hand for quick meal additions.
Grill vegetables when you grill meat.

Use these strategies to make vegetable preparation easy.

- Buy pre-washed, pre-cut vegetables.
- Prep vegetables all at once.
- Buy frozen vegetables.
- Buy canned vegetables.

Use a variety of cooking techniques to make vegetables appealing.

Roast • Grill • Stir-fry • Steam • Raw
Prepare and Eat More Meals at Home

1. PLAN
Plan meals for your family for a week, two weeks or longer—whatever works for you.

2. SHOP
Make a list of all the food you will need for your meals. Shop for a week at a time and stick to your list.

3. FIX
Stick to your plan for your meals. Make simple healthy meals for your family.

4. EAT
Eat together as a family without the TV.

Strategies to eat healthy when eating out

Prepare before you go.
Check the menu before you go so you can plan what you will order. Choose a restaurant that you know offers healthy options.

Think before you order.
Read the menu carefully and choose a healthy option.

Control portions.
Split an entrée, order an appetizer as an entrée or take part of your meal home.

Choose healthier options.
Avoid menu items that use words such as crispy, creamy, sautéed, pan-fried, buttery, breaded, sauced or stuffed. Choose simple grilled or broiled seafood, chicken, pork or beef with no sauce or sauce on the side.

Fast-food survival guide
1. Order a kid’s meal. You will get less food and fewer calories.
2. Share your meal with a family member or friend.
3. Hold the fries; choose fruit instead. If you do order fries, order a small.
4. Don’t order the large burger.
5. Skip the combo meal.
6. Choose grilled chicken with no sauce or salads with low-fat or fat-free dressing.
7. Order a diet soft drink or water.
8. Choose fast food only occasionally. Eat and prepare more meals at home.
# Check the Facts

*Use the Nutrition Facts label to learn about the foods you are selecting.*

### Definitions for terms commonly seen on food labels

- **Fat-free:** Less than 0.5g of fat per serving
- **Low-fat:** 3g of fat or less per serving
- **Reduced-fat:** 25% less fat than the original product
- **Light/Lite:** 50% less fat or 1/3 fewer calories than the original product
Keep It Safe

Clean
- Wash hands and all equipment, counters, cutting boards, dishes and utensils with soapy water.
- Make sanitizing solution by mixing 1 tablespoon chlorine bleach to 1 gallon warm (not hot) water.
- Sanitize all kitchen surfaces after cleaning.

Separate
- Keep meat separate from other foods when shopping.
- Use a separate cutting board for meats and vegetables. If you have only one cutting board, clean well with soapy water, then sanitize after using the board with meat.
- Always wash hands, cutting boards, and all utensils after coming in contact with raw meat, poultry or fish.

Cook
- Cook meats, poultry, eggs, fish and shellfish thoroughly.
- Reheat leftovers until steaming hot (165 degrees F).
- Bring sauces, soups and gravies to a boil when reheating.

Chill
- Refrigerate foods quickly. Do not leave food out more than one hour if the temperature outside is 90 degrees F or hotter.
- Thaw meats on the bottom shelf on a plate in the refrigerator. Never thaw meats on the counter.
- Thawing food in the microwave is acceptable. Plan to cook it immediately after thawing because some areas of the food may become warm and begin to cook during microwave defrosting.

How to Use a Food Thermometer
Using the color of meat as a guide to doneness is not effective. Use an instant-read thermometer to make sure meats are the correct temperature. Digital instant-read thermometers are the most accurate and can be found in grocery stores or discount stores.

1. Use a digital instant-read thermometer to check the internal temperature toward the end of the cooking time, but before the food is expected to be done.
2. The food thermometer should be placed in the thickest part of the food and should not be touching bone, fat or gristle.
3. Compare your thermometer reading to the USDA Recommended Safe Minimum Internal Temperatures to determine if your food has reached a safe temperature.
4. Make sure to clean your food thermometer with soapy water before and after each use.

There are many types of food thermometers. Follow the instructions for your food thermometer.

USDA Recommended Safe Minimum Internal Temperatures
- Steaks and Roasts: 145 degrees F—higher for medium-well or well-done
- Ground Beef: 160 degrees F
- Chicken parts: 165 degrees F
- Whole poultry: 165 degrees F
- Pork: 160 degrees F
- Fish: 145 degrees F
- Egg dishes: 160 degrees F

Clean
- Wash hands and all equipment, counters, cutting boards, dishes and utensils with soapy water.
- Make sanitizing solution by mixing 1 tablespoon chlorine bleach to 1 gallon warm (not hot) water.
- Sanitize all kitchen surfaces after cleaning.

Separate

- Use a separate cutting board for meats and vegetables. If you have only one cutting board, clean well with soapy water, then sanitize after using the board with meat.
- Always wash hands, cutting boards, and all utensils after coming in contact with raw meat, poultry or fish.

Cook
- Cook meats, poultry, eggs, fish and shellfish thoroughly.
- Reheat leftovers until steaming hot (165 degrees F).
- Bring sauces, soups and gravies to a boil when reheating.

Chill
- Refrigerate foods quickly. Do not leave food out more than one hour if the temperature outside is 90 degrees F or hotter.
- Thaw meats on the bottom shelf on a plate in the refrigerator. Never thaw meats on the counter.
- Thawing food in the microwave is acceptable. Plan to cook it immediately after thawing because some areas of the food may become warm and begin to cook during microwave defrosting.
Right-Size Your Portions

A thumb = 1 oz. of cheese
Consuming low-fat cheese is a good way to help you meet the required servings from the milk, yogurt and cheese group.
1 1/2 - 2 oz. of low-fat cheese counts as 1 of the 2-3 daily recommended servings.

Handful = 1-2 oz. of snack food
Snacking can add up. Remember, 1 handful equals 1 oz. of nuts and small candies. For chips and pretzels, 2 handfuls equals 1 oz.

A fist or cupped hand = 1 cup
1 serving = 1/2 cup cereal, cooked pasta or rice or 1 cup of raw, leafy green vegetables or 1/2 cup of cooked or raw, chopped vegetables or fruit.

Palm = 3 oz. of meat
Two servings, or 6 oz., of lean meat (poultry, fish, shellfish, beef) should be a part of a daily diet. Measure the right amount with your palm. One palm size portion equals 3 oz., or one serving.

Thumb tip = 1 teaspoon
Keep high-fat foods, such as peanut butter and mayonnaise, at a minimum by measuring the serving with your thumb. One teaspoon is equal to the end of your thumb, from the knuckle up.

Three teaspoons equals 1 tablespoon.

1 tennis ball = 1 serving of fruit
Healthy diets include 2-4 servings of fruit a day.

Because hand sizes vary, compare your fist size to an actual measuring cup.
**Move More**

*How much physical activity is enough?*

**Adulst need at least:**

<table>
<thead>
<tr>
<th>150 minutes every week</th>
<th>75 minutes every week</th>
<th>Muscle-strengthening activities on 2 or more days a week that work all major muscle groups (legs, hips, back, abdomen, chest, shoulders and arms)</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Moderate-intensity aerobic activity</strong></td>
<td><strong>Vigorous-intensity aerobic activity</strong></td>
<td>&amp;</td>
</tr>
<tr>
<td>Brisk walking</td>
<td>Jogging or running</td>
<td></td>
</tr>
</tbody>
</table>

*or an equivalent combination of moderate- and vigorous-intensity activity*

**For even greater health benefits, adults should increase their activity to:**

<table>
<thead>
<tr>
<th>300 minutes every week</th>
<th>150 minutes every week</th>
<th>Muscle-strengthening activities on 2 or more days a week that work all major muscle groups (legs, hips, back, abdomen, chest, shoulders and arms)</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Moderate-intensity aerobic activity</strong></td>
<td><strong>Vigorous-intensity aerobic activity</strong></td>
<td>&amp;</td>
</tr>
<tr>
<td>Brisk walking</td>
<td>Jogging or running</td>
<td></td>
</tr>
</tbody>
</table>

*or an equivalent combination of moderate- and vigorous-intensity activity*

To achieve and maintain a healthy weight, the amount of calories consumed should not exceed calorie requirements.

**Two ways to monitor your intensity**

**TALK TEST**

- **Light Intensity**: You should be able to sing.
- **Moderate Intensity**: You should be able to carry on a conversation.
- **Vigorous Intensity**: You become winded or too out-of-breath to carry on a conversation.

**PERCEIVED EXERTION**

Perceived exertion is how hard YOU feel that you are working. It is a way to be mindful of your body and how you feel overall while doing an activity. When determining perceived exertion, think about your body all over, not just your legs or your breathing. Think about your overall effort and rate it on a scale from 0-10, with “0” being nothing at all and “10” being the absolute maximum you can do. You want to feel like you are working, but not working so hard that you are in pain. Generally, an exertion of 5-6 is moderate-intensity activity and 7-8 is vigorous-intensity activity.
**Move More: A Sample Walking Program**

<table>
<thead>
<tr>

<td>Walk briskly 15 min.</td>
<td>Walk 5 min.</td>
<td>25 min.</td>
</tr>
<tr>
<td><strong>WEEK 7</strong></td>
<td>Walk 5 min.</td>
<td>Walk briskly 18 min.</td>
<td>Walk 5 min.</td>
<td>28 min.</td>
</tr>
<tr>
<td><strong>WEEK 8</strong></td>
<td>Walk 5 min.</td>
<td>Walk briskly 20 min.</td>
<td>Walk 5 min.</td>
<td>30 min.</td>
</tr>
<tr>
<td><strong>WEEK 9</strong></td>
<td>Walk 5 min.</td>
<td>Walk briskly 23 min.</td>
<td>Walk 5 min.</td>
<td>33 min.</td>
</tr>
<tr>
<td><strong>WEEK 10</strong></td>
<td>Walk 5 min.</td>
<td>Walk briskly 26 min.</td>
<td>Walk 5 min.</td>
<td>36 min.</td>
</tr>
<tr>
<td><strong>WEEK 11</strong></td>
<td>Walk 5 min.</td>
<td>Walk briskly 28 min.</td>
<td>Walk 5 min.</td>
<td>38 min.</td>
</tr>
<tr>
<td><strong>WEEK 12</strong></td>
<td>Walk 5 min.</td>
<td>Walk briskly 30 min.</td>
<td>Walk 5 min.</td>
<td>40 min.</td>
</tr>
</tbody>
</table>

**WEEK 13 ON**: Gradually increase your brisk walking time to 30-60 minutes, three or four times a week. Remember that your goal is to get the benefits you are seeking and enjoy your activity.

---

**WALKING TIPS**

- Hold your head up, and keep your back straight.
- Bend your elbows as you swing your arms.
- Take long, easy strides.

1. Get TV and computers out of the bedroom.
2. Plan how much TV you and your family are going to watch.
3. Set clear limits for all non-work screen time, and be a good media role model.
4. Make a list of activities you want to do instead of watching TV.
5. Don’t keep the TV on all the time—tune-in to specific shows.
6. Eat together as a family without the TV.
7. Watch TV with your children. Discuss the shows and the advertising.
8. Be mindful about the ads you see on TV and the Internet.
9. Move during commercials!
Making food choices for a healthy lifestyle can be as simple as using these 10 Tips.

Use the ideas in this list to *balance your calories*, to choose foods to *eat more often*, and to cut back on foods to *eat less often*.

1. **Balance calories**
   
   Find out how many calories YOU need for a day as a first step in managing your weight. Go to [www.ChooseMyPlate.gov](http://www.ChooseMyPlate.gov) to find your calorie level. Being physically active also helps you balance calories.

2. **Enjoy your food, but eat less**
   
   Take the time to fully enjoy your food as you eat it. Eating too fast or when your attention is elsewhere may lead to eating too many calories. Pay attention to hunger and fullness cues before, during, and after meals. Use them to recognize when to eat and when you’ve had enough.

3. **Avoid oversized portions**
   
   Use a smaller plate, bowl, and glass. Portion out foods before you eat. When eating out, choose a smaller size option, share a dish, or take home part of your meal.

4. **Foods to eat more often**
   
   Eat more vegetables, fruits, whole grains, and fat-free or 1% milk and dairy products. These foods have the nutrients you need for health—including potassium, calcium, vitamin D, and fiber. Make them the basis for meals and snacks.
5. Make half your plate fruits and vegetables
Choose red, orange, and dark-green vegetables like tomatoes, sweet potatoes, and broccoli, along with other vegetables for your meals. Add fruit to meals as part of main or side dishes or as dessert.

6. Switch to fat-free or low-fat (1%) milk
They have the same amount of calcium and other essential nutrients as whole milk, but fewer calories and less saturated fat.

7. Make half your grains whole grains
To eat more whole grains, substitute a whole-grain product for a refined product—such as eating whole-wheat bread instead of white bread or brown rice instead of white rice.

8. Foods to eat less often
Cut back on foods high in solid fats, added sugars, and salt. They include cakes, cookies, ice cream, candies, sweetened drinks, pizza, and fatty meats like ribs, sausages, bacon, and hot dogs. Use these foods as occasional treats, not everyday foods.

9. Compare sodium in foods
Use the Nutrition Facts label to choose lower sodium versions of foods like soup, bread, and frozen meals. Select canned foods labeled “low sodium,” “reduced sodium,” or “no salt added.”

10. Drink water instead of sugary drinks
Cut calories by drinking water or unsweetened beverages. Soda, energy drinks, and sports drinks are a major source of added sugar, and calories, in American diets.

Go to www.ChooseMyPlate.gov for more information.
